

Ranger II PRODUCT BENEFITS

Ranger II alfalfa was developed directly from Ranger alfalfa for use under irrigated and dryland conditions from the northern plains to the winter hardy and moderately winter hardy intermountain areas of the west. Ranger II has the drought tolerance of Ranger with improved disease resistance for longer persistence, superior forage yields and adaption to a wider range of soil conditions.

- Developed Directly From Ranger
- Excellent drought tolerance
- Adapted to variable soil conditions
- Winter hardy and persistent
- Superior forage yield when compared to Ranger
- Certified seed production

Resistance Ratings	
Fusarium Wilt	Moderately Resistant
Verticillium Wilt	Moderately Resistant
Bacterial Wilt	Moderately Resistant
Anthraco nose Race I	Resistant
Phytophthora Root Rot	Moderately Resistant
Stem Nematode	Resistant
