

ATS 320ML PRODUCT BENEFITS

ATS 320 Multi-Leaf branded alfalfa is designed for excellent forage yield and quality. It has four or more leaflets per petiole compared to three leaflets on traditional trifoliolate varieties. More leaflets on the plant increases the leaf to stem ratio which raises the alfalfa feed quality. ATS 320ML is well adapted to all areas where fall dormancy 2 and 3 varieties are grown. With excellent forage potential, a great disease resistance package, and a highly competitive price point ATS 320ML will not disappoint.

- High multifoliolate leaf expression
- Very competitively priced
- Exceptional forage yield potential
- Excellent forage quality
- Adapted to variable soil conditions
- Superior winter survival for improved stand persistence
- Excellent in 2 & 3 cut systems
- 30/30 rating on the Wisconsin Disease Rating Index

Resistance Ratings	
Fusarium Wilt	Highly Resistant
Verticillium Wilt	Highly Resistant
Bacterial Wilt	Highly Resistant
Anthraco nose Race I	Highly Resistant
Phytophthora Root Rot	Highly Resistant
Aphanomyces (Race I)	Highly Resistant
