ALFALFA

428RR PRODUCT BENEFITS

428RR alfalfa lets you produce cleaner, higher quality alfalfa for greater profit potential. The simplicity and improved crop safety of using one herbicide with the widest window of application available enables you to be in control. 428RR alfalfa performs well over a wide range of environmental conditions and is adapted to all areas where 3, 4 and 5 fall dormancy varieties are planted. Whether it's for great forage yields, superior forage quality or very fast recovery after cutting, 428RR is the choice for commercial hay, beef and dairy producers who want to take advantage of Roundup Ready® Alfalfa technology.

- Unsurpassed weed control
- Great forage yield potential
- Superior forage quality
- High multifoliate leaf expression
- Germination salt tolerance
- Excellent winterhardiness and persistence
- Resistant to Pea Aphid and Stem Nematode
- All-Vantage seed coating enhanced with inoculant, fungicide, Aquabond® water absorbing polymer and NUTRI-START® micronutrients.
